

## IS YOUR ROUTER READY FOR THE HOLIDAYS?

October marks the beginning of the holiday season: From s'mores around the bonfire to hot mulled cider around the hearth, families are likely to spend more of the holiday season together at home this year. If you plan to play host for Thanksgiving, New Year's Eve or any celebration in between, you'll want to be sure the whole family is able to get online for gaming, shopping, streaming and sharing. Here are a few easy tips to make sure your Wi-Fi is up to speed so that everyone is happy while you're entertaining this holiday season. Best of all, these steps don't require any special tools or technical knowledge!

- 1) **Put Your Router Front and Center.** Moving your router to a more central location could bring the most dramatic improvements to your Wi-Fi performance. The more walls, floors and obstacles the signal has to travel through, the weaker the signal will be. Place your router near where the most activity will be—where you gather to watch football or to cook the family feast.
- 2) **Reset your router.** Routers are like small computers, and sometimes the memory and processor can benefit from a fresh start.
- 3) **Adjust the antennas.** One sends a signal and one receives it, so having them pointed in the same direction gives you a more consistent performance. Try pointing the antennas directly upward for the best signal path.
- 4) **Consider a Wi-Fi tune-up.** If you don't have a reliable signal, it won't matter what your speeds are. If you aren't happy with your speeds or performance, let our pros help you get the most out of the speed you are paying for. Give us a call at 455-4515.

## COVER YOUR WHOLE HOME WITH MESH WI-FI

For the best complete-home coverage with the highest speeds possible, consider upgrading to our Mesh Wi-Fi system.

Mesh is a Whole Home Wi-Fi system built to eliminate dead zones and provide uninterrupted wireless coverage throughout your home.

While traditional routers broadcast Wi-Fi from a single point with a limited range, mesh Wi-Fi systems have multiple access points. When one unit links to the modem, that unit becomes the main hub. The other units (pods) capture and rebroadcast the router's signal at full strength.

The result is an efficient wireless network that provides a stable connection no matter where you are. A mesh system enables devices in your network to have faster speeds, greater coverage, and a more reliable connection than you would get by adding Wi-Fi extenders to a traditional router.

Take the guesswork out of deciding which router is right for you. LightTube offers mesh Wi-Fi for less than \$12 a month. For larger homes, additional pods are available for a minimal cost.

To find out more, call 455-4515, option 2 today!

## Keeping You Up To Speed

### Christmas Parade

The Tullahoma Christmas Parade will travel down Jackson Street on Friday, December 1. If you can't be there, you can watch it **LIVE** on LightTube Channel 6 and on our TUA LightTube Facebook page. Replays will air throughout the month on LightTube Channels 6 and 15.

### TECHTIPS

## Commercial Phone Service

Whether you own a small retail shop or run a large company that does business all around the world, LightTube offers commercial phone service to suit all of your business needs.

Our robust, cloud-hosted Private Branch Exchange (PBX) system can help you connect with more customers, distributors, and suppliers—without the headache of having to maintain your own on-site system.

PBX enables internet-based communication both within and outside your organization. It's easy to set up, it's reliable, and LightTube provides and maintains all the equipment, which saves your business time and money!

If your company's growth means regularly adding new phone lines, or if your employees frequently work in the field or from home, PBX allows your business phone numbers to exist in the cloud, where they can be accessed anywhere from devices that connect to the internet.

For more information about our feature-rich commercial phone service, which includes unlimited long distance calling, give us a call at 455-4515.
